Education

Batangas State University - TNEU

Master of Science in Data Science

Present

Batangas City, Philippines

Batangas State University - TNEU

Bachelor of Science in Information Technology

Aug 2019 – Aug 2023

Golden Country Homes, Alangilan, Batangas City

Major in Business Analytics

Work Experience

BatStateU - Digital Transformation Center

Feb 2023 – May 2023

Frontend Developer Intern

Onsite

- Designed and developed mockups and user interfaces for a **mobile application project** using **Figma** and **React Native**.
- Led the design and implementation of a **web application frontend** using **Figma**, **HTML5**, **CSS**, and **JavaScript**.
- Contributed to backend development for a **web application project** using **PHP** and **MySQL**.

Freelance Software Developer

Oct 2023 – Present

Software Developer

Remote

- Developed user-friendly frontends for web applications using **React**, **Next.js**, **Tailwind**, and **Redux Toolkit**, providing distinct interfaces for various functionalities.
- Built and maintained backends leveraging **Node.js**, **Express.js**, **MongoDB**, **MySQL**, **PostgreSQL**, and **RESTful APIs** for efficient data handling.
- Created a mobile application with **React Native** and integrated **Appwrite** as a backend-as-a-service.
- Implemented secure authentication with **Access and Refresh Tokens**.
- Automated API testing and validation workflows using **Postman**.

BatStateU - STEER Hub (TRIOE Project)

Nov 2024 – Present

University Research Associate (Full Stack Web Developer)

Onsite

- Developed and maintained responsive frontends for **TRIOE**, **BatStateU Marketplace**, and a **University Shop** using **Next.js 15**, **TypeScript**, **TanStack Query**, **Shadcn UI**, and **Tailwind CSS**, focusing on performance and scalability.
- Developed a **multi-vendor e-commerce web application** for Batangas State University, enabling university-related vendors to manage products and support online marketplace operations.
- Built backend services with **Node.js**, **Sequelize**, and **MySQL**, ensuring modular and reliable system architecture.
- Implemented automated **testing workflows** including unit, integration, and end-to-end testing to ensure code quality and reduce defects.
- Managed scalable deployments on a **Namecheap Dedicated Server (Ubuntu)**, leveraging **Docker** for containerization and **Nginx** for reverse proxy configurations.
- Established **CI/CD pipelines** with **GitHub Actions** to automate builds, testing, and deployments, improving release velocity and minimizing downtime.

Personal Projects

Med-Vission | Website

AI Chest X-ray Analyzer

- * Developed an **AI-powered chest X-ray analyzer** that classifies X-ray images as either **pneumonia** or **normal**.
- * Built the system to provide a simple and accessible web-based interface for medical image analysis use cases.
- * Source code is kept private to protect the project implementation and deployment details.

Penny Wise

React Native | Local Mobile App

- * Developed a **fully local budget tracker mobile application** using **React Native**.
- * Designed the app to help users manage expenses and personal finances without relying on external cloud storage.
- * Project link and repository are private for confidentiality and data privacy reasons.

Owli React Native | AI-Powered Review App

- * Built an **AI-powered LET review companion** using **React Native**.
- * Designed the application to support learners preparing for the Licensure Examination for Teachers through AI-assisted review features.
- * Focused on creating a mobile-first review experience with accessible and user-friendly learning support.

Mhar | *Source Code* JavaScript | Node.js | Ollama | Llama 3.2

- * Created a Chrome Extension powered by **Llama 3.2** through **Ollama** that provides contextual AI insights directly within web pages.
- * Focused on efficient parsing, minimal resource usage, and seamless integration for a lightweight user experience.

Malinta Connect | *Website | Source Code* Next.js 15 | Firebase | ReactJS | Tailwind

- * Developed a community platform for Brgy. Malinta, Los Baños, Laguna with features including **online report filing**, **appointment scheduling**, and **real-time request tracking**.
- * Implemented a secure authentication system and real-time interactions using **Firebase**.

Trainings and Certifications

Software Engineering Training | *Certificates* DICT

- * Completed a **comprehensive software engineering course**, from fundamentals to advanced practices.

Cloud Computing Training | *Certificates* DICT

- * Completed a **foundational cloud computing course**.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, R, PHP, SQL, HTML5, CSS

Data Analysis & Forecasting: Python, Jupyter Notebook, R, RStudio, data preprocessing, exploratory data analysis, forecasting fundamentals

Frameworks & Libraries: ReactJS, React Native, Next.js, Node.js, Express, NestJS, FastAPI, Redux, Zustand, TanStack Query, Tailwind CSS, Bootstrap, Sass

Databases & Storage: MySQL, PostgreSQL, MongoDB

Backend-as-a-Service (BaaS): Firebase, Supabase, Appwrite

ORM & Database Tools: Prisma, Sequelize, Mongoose

AI & LLMs: LLM integration, OpenAI, Claude, V0, Ollama, LLM server deployment, AI-assisted development using Cursor, Claude Code, Codex, ChatGPT, and other AI coding tools

Hosting & Cloud Providers: Namecheap, AWS

Testing: Jest, Vitest, Cypress

DevOps & Deployment: CI/CD with GitHub Actions, Docker, Nginx, Apache

Developer Tools: Git, Postman, VSCode, PyCharm, Eclipse, Figma, Arduino IDE

IoT & Hardware: Basic knowledge of TRIOE Board, ESP32, sensors, and actuators

Operating Systems: macOS, Windows, Linux Ubuntu

Other Tools: MS Word, PowerPoint, Excel, Photoshop, Research Tools
